

HandPunch® 1000

TIME & ATTENDANCE TERMINAL

A Biometric time clock that is truly affordable for small to midsize businesses.

Recognition Systems, Inc. now brings the accuracy and convenience of biometric technology easily within reach of most time and attendance applications. In operations that range from coal mines to clean rooms, RSI systems have proven themselves to be a practical and precise solution. Our terminals are so affordable, it doesn't make sense to consider any other technology.

FEATURES & BENEFITS

- Saves money over card-based systems
- Eliminates Badges
- Eliminates Buddy Punching
- Fast and easy to use
- Provides the most accurate time and attendance solution available

Features and Options:

Your Hand Is Your Card

There are no cards to create, administer, carry - or lose. The HandPunch 1000 verifies employees' identities in less than one second, based on the unique size and shape of their hands. For small companies, the HandPunch 1000 provides a quick return on investment by eliminating the cost associated with administrating and managing cards. For companies that have small, multiple locations, minimal supervision leaves opportunity for buddy punching and time fraud. With the HandPunch 1000 one employee can't punch for the other. Time fraud is eliminated thereby reducing payroll costs and increasing the company's bottom line.

Pay As You Grow

Designed to grow with your business, the user capacity of the HandPunch 1000 can be easily expanded in the field. Standard user memory provides for up to 50 employees with the expandability to grow to 512 users.

Hand Geometry Technology

The HandPunch 1000 uses RSI's field-proven hand geometry biometric technology. The terminal captures a three-dimensional image of the hand each time the employee punches. The hand's size and the shape are used to verify their identity with unparalleled accuracy. No fingerprints or palm prints are utilized. Green and red lights notify the employee of the status of each punch. There's no question any more; employees have to be there to punch.

Small Enterprise Solution

The HandPunch 1000 provides a new solution for companies with 50 employees or less per terminal or location. The HandPunch 1000 terminal allows for collection of in and out punches plus allows easy connectivity to any time and attendance application. With the HandPunch 1000 small companies no longer need to worry about lost timecards, making new cards, or employees punching for another employee.

Pay for only what you need

The HandPunch 1000 comes standard with user capacity for 50 users. As your business grows, so can the user capacity of the HandPunch 1000. Memory upgrades are available to expand to 100 or even up to 512 users. The upgrade can be easily performed in the field without removing the unit from the wall. With a built in transaction memory to store over 5,000 punches the HandPunch 1000 ensures your employees' data is safe.

Communication Options

The HandPunch 1000 connects quickly to the time and attendance PC via a provided 50-foot RS-232 communications cable. An optional internal 14.4 K baud dial-up modem is available for remote sites.

SPECIFICATIONS

Part Number: HP-1000

Size: 8.85 in (22.3 cm) wide
11.65 in (29.6 cm) high
8.55 in (21.7 cm) deep

Weight: 6 lbs (2.7 kg)

Power: 12 to 24 VDC or 12 to 24 VAC 50-60 Hz, 7 watts
14°F to 140°F (-10°C to 60°C) non-operating/storage
32°F to 113°F (0°C to 45°C) operating
5% to 85% non-operating/storage
20% to 80% operating

Verification Time: Less than one second

Memory Retention: xUp to 5 years via the standard internal lithium battery.

Transaction Storage: 5120 transactions

ID Number Length: 1 to 10 digits from keypad or card

User Capacity: 50 users expandable to 512 users

Template Size: 9 bytes

Communications: RS-232, 50 foot cable included

Baud Rate: 300 to 28.8 Kbps

Options: BB-200 Operational Battery Backup
EM-701 Memory Expansion - 50 to 100 users
EM-702 Memory Expansion - 50 to 512 users
MD-500 High Speed Internal Modem
